

ELECTRICAL & INSTRUMENTATION ENGINEER

Contec is an engineering consultancy company of Belgian origin, specialized in the automation of industrial production processes. Our activities include programming work (PLC, SCADA, MES/IT), Electrical & Instrumentation (E&I) Engineering, electrical power studies and process safety. Contec operates within a wide variety of sectors, including the (petro-) chemicals, pharmaceuticals and the food sector. In addition, Contec's activities are not limited to Belgium.

With a large number of successful international projects under our belt we are at home working in different countries across the world.

We are always looking for dynamic employees with a passion for technology and innovation. Recent graduates or people with limited experience are also more than welcome!

WE ARE LOOKING FOR...

- You have a **Master's degree** in **Engineering**, preferably in **Electrotechnics** or **Electromechanics**
- You have an **analytical mind** and you often come up with creative solutions
- You are **communicative** and function well in a team context
- A client-based approach is very important to you
- You can keep a cool head in stressful situations, and seek out the best solution whilst maintaining a good relationship with the client
- You are able to structure your work independently and **meet deadlines**
- You work **accurately** with attention to safety
- It is important that you are **prepared to travel** (eg. for project commissioning)
- You have a high interest in technical work and following up and learning new technologies. Innovation is crucial at Contec.
- You have practical knowledge of **MS Office** (including Access)
- By strong preference you have knowledge of the following technologies:
 - » Cable calculations
 - » Selection of electrical components
 - » Knowledge of legal standards and guidelines such as EN60204.1, etc.
 - » Eplan P8
 - » Instrumentation & Measurement and Control engineering
 - » Overall industrial automation

WHAT WE OFFER...

- **Competitive salary** with **extra-legal benefits** like medical care for you and your family, pension plan paid by the employer, yearly bonuses,...
- Working on **interesting projects worldwide in an international team**, a mixture of young as well as experienced engineers
- Trainings abroad
- **Flexible working hours**
- Friendly workplace in the city center
- Noncorporate atmosphere and **regularly organised company events**
