

Diagnose Engineer

Location: Lehliu, Calarasi, RO

Company: Bunge

Bunge - Leaders in agribusiness, food and ingredients

Bunge (NYSE: BG) is a world leader in sourcing, processing and supplying oilseed and grain products and ingredients. Founded in 1818, Bunge's expansive network feeds and fuels a growing world, creating sustainable products and opportunities for more than 70,000 farmers and the consumers they serve across the globe. The company is headquartered in St. Louis, Missouri and has 25,000 employees worldwide who stand behind more than 350 port terminals, oilseed processing plants, grain facilities, and food and ingredient production and packaging facilities around the world.

Be part of a team dedicated to improving the agribusiness and food production chain. Everyone, everywhere needs nutritious food to lead healthy and productive lives. The global agri-food chain sustains families, societies, economies and nations, and that chain depends on us. We source oilseeds and grains, manage a global logistics network to transport them worldwide, and create value-added food and ingredients for customers and consumers.

Are you willing to consolidate your career in the technical field? Looking to make a difference in one of the biggest global companies in agri-business (you probably have heard about our brands, Florid and Unisol), in one of the most stable industries at the time being? How about applying for our Diagnose Engineer role, based in Lehliu? Read the vacancy below and learn more about it!

What you will be doing as an Diagnose Engineer ?

The core focus of the Diagnose Engineer activity is to monitor and improve the functioning of the industrial machines in our Lehliu Factory, with the optimal use of the available resources. This will be done through the following activities:

What you will be doing as an Diagnose Engineer ?

The core focus of the Diagnose Engineer activity is to monitor and improve the functioning of the industrial machines in our Lehliu Factory, with the optimal use of the available resources. This will be done through the following activities:

- Monitor the industrial machines the factory, using specific techniques such as vibrations, thermography, ultrasounds;
- Analyzing the results of performed inspections;
- Participation in the root cause analysis and contributing to identifying solution/ corrective measures;
- Suggest improvement measures and tools for the testing process;
- Maintaining data-bases for the assigned machines and regular updating of the corresponding "Assets Health"

The position is based in Lehliu, it will report to our Reliability Manager, also located in Lehliu. Our new colleague will be part of a team of 4 employees.

What does your future Manager have to say about this position?

The position is fast paced, due to close connection to production needs, but at the same time providing lots of opportunities for technical learnings, as we use complex work machinery! As well, Bunge is an big international organization and we offer to our employees plenty of occasions of knowledge exchanges with colleagues from other plants in the world. Moreover, you will gain a complex overview on our contractors. If you are focused on always improving your technical knowledge and like to work sometimes in interesting conditions- such as height or confined spaces, this is the role for you!

What do we expect from our Diagnose Engineer ?

You are an energetic person and a reliable professional, able to work independently at times but as well within a team. You love the technical part of your role, working outside the office most of the time and you are very organized, setting up priorities ahead. You are pro-active in addressing and solving potential risks of stopping production. What else do we expect?

- Technical university degree- with a major in in either Mechanical/ Electronics/ Electrical fields;
- 3-5 years of experience in a similar position for other companies with production activity, preferably in food area;
- Knowledge in using SPM, FLIR, UE SYSTEM tools;
- Technical English skills- intermediate level as a minimum;
- SAP knowledge is a plus;
- MS Office- intermediate (especially Excel knowledge);
- Certifications for performing thermographic inspections (ITC), vibrations checks (BINDT, MOBIUS) and ultrasounds measuring (UE SYSTEM) are a plus;
- Availability for work at height (will be checked with a medical examination prior to being hired).
- Availability to daily commute to our plant in Lehliu.

What do we offer to our Diagnose Engineer ?

A dynamic position, which can make the difference within an international organization placing safety on top of its priorities, with multiple options to develop your technical skills.

What else can you expect from Bunge?

- A competitive salary and great benefits package (professional protection equipment, medical services, lunch provided at the factory);
- Work within an experienced team;
- The right tools for the right job;
- Shuttle bus transportation to our factory- several times/day;
- An entrepreneurial environment, where you will have the freedom to contribute with your own input in order to improve our processes.
